SAN SALVADOR

Gateway to the New World

Christopher Columbus landed on the island of San Salvador more than 500 years ago (mistaking it for what was then called the East Indies, whoops), with its white-sand beaches and turquoise Caribbean water. It's the same island that Club Med founder Gilbert Trigano rediscovered in the '80s and developed into one of his most cherished resorts. This love ran so deep for Trigano and his wife that she decorated the resort with her personal art collection from around the world.

Nearly 25 years later, this special collection remains. Along with it - a colonial architectural style developed by Club Med and local residents that respected the location's history and natural beauty. Club Med christened the new resort "Columbus Isle" after the explorer who landed there so many years ago. It remains a precious gem of the Bahamas, treasured by many international celebrities for the peace, privacy and authenticity that keeps them coming back.

Adventurous Excursions*

While you're here, you'll have access to numerous excursions around the island, ranging from mild to wild. Take a lagoon tour to see the fascinating wildlife that inhabits the shores and shallows nearby. Grab some lobster and have a picnic (try not to eat too much sand). If you're feeling adventurous, take a deep-sea fishing tour and catch trophy fish like swordfish, marlin, tarpon and tuna. Or, bike down to nearby Cockburn Town and take in some local culture (and food).
